

S/053/066

Hi Doug,

Lonny Hafen requested an inspection to verify the reclamation expected on his expired notice (Quail #45 claim/U-78928). I told him he needed to follow the reclamation items listed on the March 23, 2005 Notice Decision letter and also to contact you. I told him the reclamation should include moving the larger rocks against the face of the opencut and covering with available fines/topsoil. Then contour to slope the cut and road area. In the cut, I did not expect much success with the seeding due to the gypsum.
